

# Are you a Green Certified Designer?

Do you specify only Low Emission Paints.....?

Do you specify Low VOC (Volatile Organic Compound) and low HAP (Hazardous Air Pollutant) products on wayfinding and branding elements.....?

Do your approved sources only apply environmentally responsible paint products that meet the Federal Register VOC Standard below.....?

*"No owner or operator of a facility engaged in the surface coating of miscellaneous metal parts and products subject to this Section may cause, allow or permit the discharge into the atmosphere of any volatile organic compound in excess of: 3.5 lb/gal for an Air-dried coating" Sourced from Federal Register 62FR 32688*

How will **your** clients view your current environmental practices.....?

With QHF Brand Products "**Leading the Way**", your approved sources will not sacrifice performance, production time or endure higher paint cost to lower their environmental carbon footprint and be compliant.

QHF brand products provide undercoats and topcoats that are heavy metal free, extremely low in VOC (2.1 lbs or less) with low HAP or no HAP formulations that are well below 3.5 lbs per gallon.

Identity and branding facilities are required to become low emission generators, reducing the overall carbon footprint on the environment. QHF, with its environmentally responsible products, exceeds these requirements by offering green friendly coatings that will lower paint material cost, lower the carbon footprint and improve production times all while creating a valuable selling tool for your business.
