

# Q-COAT DC™

DISPLAY  
COATING

*Designed to meet the requirements of painting solvent sensitive foams, plastics and rigid PVC type materials!*

Q-COAT DC™ Display Coating is formulated with special resins and UV resistant pigments to provide a durable, fast dry, single component, acrylic based product. Used extensively on wayfinding, plaques, signage, and interior / exterior displays or wherever plastic type substrates need to be coated quickly and cost effectively.

Available in stock colors, pre-mixed program colors or when utilizing a mixing machine, colors can be mixed by using the Q-COLR™ Concentrated Colorants and Q-BASE DB™ Binders.

## Q-BASE DB™ BINDER GLOSS LEVELS

High Gloss  
Semi-Gloss

Low Gloss  
Matte

Mixing with our uniquely formulated Q-BASE DB™ Brand Binders results in lower inventory requirements, consistently reproducible gloss levels, and reduced labor steps during application.
